

Groundwater: State of the Science and Practice

Table of Contents

Bacteriology of the Water Well by John H. Schnieders, Ph.D., CPC

Carbon Sequestration by Michael Celia and Ryan Edwards

Contaminant Hydrogeology by Kevin D. Svitana, Ph.D., PG, CP

Environmental Isotope Tracers by Ian D. Clark and Josué J. Jautzy

Fractured Rock Environments by Paul A. Hsieh

Geophysics (Surface/Aerial/Subsurface) by John Jansen, Ph.D., PGp, Doug Laymon, PG, and Finn Michelsen, PG

Groundwater and Unconventional Oil and Gas Development by Daniel J. Soeder

Groundwater Depletion by Ken Rainwater, Ph.D., PE, BCEE, D.WRE, CFM

Groundwater Management by Robert E. Mace, Ph.D., PG

Groundwater Modeling by Henk M. Haitjema and Randall J. Hunt

Groundwater Pump Systems by Dave Kill

Groundwater Remediation Technologies by Ryan Wymore, PE

Groundwater Sustainability by William M. Alley, Ph.D.

Land Subsidence by Michelle Sneed

Managed Aquifer Recharge by Daniel B. Stephens, Amy Ewing, and Stephanie J. Moore

Site Characterization by Patrick Curry, Joseph Quinnan, Nicklaus Welty, and John Horst

Surface Water/Groundwater Interaction by Jeffrey A. Johnson, Ph.D.

Well Construction by Tom Christopherson

Well Design by Marvin Glotfelty, RG

Well Maintenance and Rehabilitation by Stuart A. Smith, MS, CGWP
