

Groundwater: State of the Science and Practice

Table of Contents

Foreword	1
Bacteriology of the Water Well	3
Carbon Sequestration	6
Contaminant Hydrogeology	11
Environmental Isotope Tracers	15
Fractured Rock Environments	21
Geophysics (Surface/Aerial/Subsurface)	24
Groundwater and Unconventional Oil and Gas Development	29
Groundwater Depletion	33
Groundwater Management	38
Groundwater Modeling	41
Groundwater Pump Systems	47
Groundwater Remediation Technologies	50
Groundwater Sustainability	54
Land Subsidence	58
Managed Aquifer Recharge.....	63
Site Characterization.....	67
Surface Water/Groundwater Interaction	72
Well Construction.....	76
Well Design.....	81
Well Maintenance and Rehabilitation	86
Author Biographies	92
