Groundwater Use in Arkansas

Overview\(^1\)

**Total**
Groundwater (mgd — fresh, not saline) ........................................... 7,780
Percentage of total freshwater* supply for state ...................... 68.90%

**Public Supply**
Groundwater (mgd) ........................................................................ 134
Percentage of total groundwater .............................................. 1.72%
Percentage of total public supply .............................................. 31.20%

**Individual Household**
Groundwater (mgd) ........................................................................ 12.8
Percentage of total groundwater .............................................. 0.16%
Percentage of total individual household supply ...................... 100%

**Irrigation**
Groundwater (mgd) ........................................................................ 7,380
Percentage of total groundwater .............................................. 94.90%
Percentage of total irrigation .................................................. 84.60%

**Livestock/Aquaculture**
Groundwater (mgd) ........................................................................ 197
Percentage of total groundwater .............................................. 2.53%
Percentage of total livestock/aquaculture ................................ 64.00%

**Industrial, Self-Supplied**
Groundwater (mgd) ........................................................................ 56.1
Percentage of total groundwater .............................................. 0.72%
Percentage of total industrial, self-supplied ............................ 20.70%

**Mining**
Groundwater (mgd) ........................................................................ 0.18
Percentage of total groundwater .............................................. 0.00%
Percentage of total mining ...................................................... 0.41%

**Thermoelectric**
Groundwater (mgd) ........................................................................ 4.26
Percentage of total groundwater .............................................. 0.05%
Percentage of total thermoelectric .......................................... 0.28%

---

Groundwater’s Role in Arkansas’s Economic Vitality

• Few states can accurately or confidentially determine how many residential wells are in place. For each region, the American Housing Survey by the U.S. Census provides regional data. Arkansas is found in the South, along with these other states: Maryland, Delaware, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Texas, Oklahoma, Arkansas, Tennessee, and Kentucky. The last American Housing Survey Census indicates this region had 4,360,000\(^2\) households served by residential wells, with an average of 2.56\(^3\) persons per household. The U.S. Census stopped asking citizens their source of water supply following the 1990 Census. The USGS estimates the population of self-supplied water supply users in Arkansas to be 144,000\(^4\).

• 399 community water systems use groundwater for 891,000 people\(^5\)
• 31 non-community, non-transient water systems use groundwater for 9,000 people\(^6\)
• 203 non-community, transient water systems use groundwater for 16,000 people\(^7\)
• 48,300 irrigation wells used serving 3,720 farms and 4,490,000 acres\(^8\)
Arkansas’s Groundwater Industry Employment

Men and women working to provide and protect Arkansas’s groundwater resources for the benefit of people, business, and our environment.

Arkansas’s Contracting Employment
Drill and service water wells, install and service pumps, install and service point of use water treatment devices. This portion of the industry is characterized by small firms, many of which are multi-generation family-owned and operated.\(^9\)

- 63 firms employ an estimated 366 people\(^{10}\)
- Annual estimated sales of $89.7 million

Arkansas’s Scientists and Engineers Employment
Geologists, hydrogeologists, engineers, geochemists, geophysicists, microbiologists, regulators.

Environmental Consulting\(^{11}\)
NAICS 54162: Establishments primarily engaged in providing advice and assistance on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, and hazardous materials.

- 142 firms employ an estimated 475 people
- Annual estimated sales of $77.7 million

Remediation\(^{12}\)
NAICS 56291: Establishments include those engaged in remediation and cleanup of contaminated buildings, mine sites, soil, or groundwater.

- 35 firms employ an estimated 325 people
- Annual estimated sales of $45.3 million

Public Service and Universities, Colleges, and Research Centers
- Many more dedicated individuals
