

# Groundwater Use in Florida

## Overview<sup>1</sup>

### Total

Groundwater (mgd — fresh, not saline)..... 3,970  
Percentage of total freshwater\* supply for state..... 64.00%

### Public Supply

Groundwater (mgd) ..... 2,010  
Percentage of total groundwater..... 50.60%  
Percentage of total public supply ..... 88.60%

### Individual Household

Groundwater (mgd) ..... 214  
Percentage of total groundwater..... 5.39%  
Percentage of total individual household supply ..... 100%

### Irrigation

Groundwater (mgd) ..... 1,580  
Percentage of total groundwater..... 39.80%  
Percentage of total irrigation..... 54.10%

### Livestock/Aquaculture

Groundwater (mgd) ..... 21  
Percentage of total groundwater..... 0.53%  
Percentage of total livestock/aquaculture..... 90.50%

### Industrial, Self-Supplied

Groundwater (mgd) ..... 165  
Percentage of total groundwater..... 4.16%  
Percentage of total industrial, self-supplied ..... 77.50%

### Mining

Groundwater (mgd) ..... 78.8  
Percentage of total groundwater..... 1.98%  
Percentage of total mining..... 69.70%

### Thermoelectric

Groundwater (mgd) ..... 43.5  
Percentage of total groundwater..... 1.10%  
Percentage of total thermoelectric..... 7.10%

(mgd = million gallons per day)

\*All totals and ratios are measures of freshwater only.

## Groundwater's Role in Florida's Economic Vitality

- Few states can accurately or confidentially determine how many residential wells are in place. For each region, the American Housing Survey by the U.S. Census provides regional data. Florida is found in the South, along with these other states: Maryland, Delaware, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Texas, Oklahoma, Arkansas, Tennessee, and Kentucky. The last American Housing Survey Census indicates this region had 4,360,000<sup>2</sup> households served by residential wells, with an average of 2.65<sup>3</sup> persons per household. The U.S. Census stopped asking citizens their source of water supply following the 1990 Census. The USGS estimates the population of self-supplied water supply users in Florida to be 1,910,000<sup>4</sup>.
- 1,590 community water systems use groundwater for 14,600,000 people<sup>5</sup>
- 821 non-community, non-transient water systems use groundwater for 208,000 people<sup>6</sup>
- 2,930 non-community, transient water systems use groundwater for 246,000 people<sup>7</sup>
- 20,800 irrigation wells used serving 7,030 farms and 743,000 acres<sup>8</sup>

# Florida's Groundwater Industry Employment

Men and women working to provide and protect Florida's groundwater resources for the benefit of people, business, and our environment.

## Florida's Contracting Employment

Drill and service water wells, install and service pumps, install and service point of use water treatment devices. This portion of the industry is characterized by small firms, many of which are multi-generation family-owned and operated.<sup>9</sup>

- 391 firms employ an estimated 1,950 people<sup>10</sup>
- Annual estimated sales of \$581 million

## Florida's Scientists and Engineers Employment

Geologists, hydrogeologists, engineers, geochemists, geophysicists, microbiologists, regulators.

### Environmental Consulting<sup>11</sup>

NAICS 54162: Establishments primarily engaged in providing advice and assistance on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, and hazardous materials.

- 1,340 firms employ an estimated 4,090 people
- Annual estimated sales of \$611 million

### Remediation<sup>12</sup>

NAICS 56291: Establishments include those engaged in remediation and cleanup of contaminated buildings, mine sites, soil, or groundwater.

- 278 firms employ an estimated 2,690 people
- Annual estimated sales of \$389 million

### Public Service and Universities, Colleges, and Research Centers

- Many more dedicated individuals
