Groundwater Use in Louisiana

Overview

Total
- Groundwater (mgd — fresh, not saline) ........................................ 1,570
- Percentage of total freshwater* supply for state ..................... 18.40%

Public Supply
- Groundwater (mgd) .................................................................... 378
- Percentage of total groundwater ............................................ 24.10%
- Percentage of total public supply ............................................. 50.70%

Individual Household
- Groundwater (mgd) ................................................................. 47
- Percentage of total groundwater .............................................. 2.99%
- Percentage of total individual household supply ..................... 100%

Irrigation
- Groundwater (mgd) ................................................................. 670
- Percentage of total groundwater ............................................ 42.70%
- Percentage of total irrigation .................................................. 72.20%

Livestock/Aquaculture
- Groundwater (mgd) ................................................................. 201
- Percentage of total groundwater .............................................. 12.80%
- Percentage of total livestock/aquaculture................................. 63.10%

Industrial, Self-Supplied
- Groundwater (mgd) ................................................................. 231
- Percentage of total groundwater .............................................. 14.70%
- Percentage of total industrial, self-supplied ............................. 11.20%

Mining
- Groundwater (mgd) ................................................................. 5.32
- Percentage of total groundwater .............................................. 0.34%
- Percentage of total mining ....................................................... 47.10%

Thermoelectric
- Groundwater (mgd) ................................................................. 41.1
- Percentage of total groundwater .............................................. 2.62%
- Percentage of total thermoelectric ........................................... 0.93%

(mgd = million gallons per day)

*All totals and ratios are measures of freshwater only.

Groundwater’s Role in Louisiana’s Economic Vitality

- Few states can accurately or confidentially determine how many residential wells are in place. For each region, the American Housing Survey by the U.S. Census provides regional data. Louisiana is found in the South, along with these other states: Maryland, Delaware, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Texas, Oklahoma, Arkansas, Tennessee, and Kentucky. The last American Housing Survey Census indicates this region had 4,360,000 households served by residential wells, with an average of 2.6 persons per household. The U.S. Census stopped asking citizens their source of water supply following the 1990 Census. The USGS estimates the population of self-supplied water supply users in Louisiana to be 588,000.

- 927 community water systems use groundwater for 2,950,000 people
- 129 non-community, non-transient water systems use groundwater for 52,000 people
- 216 non-community, transient water systems use groundwater for 50,900 people
- 8,550 irrigation wells used serving 1,600 farms and 883,000 acres

Louisiana’s Groundwater Industry Employment

Men and women working to provide and protect Louisiana’s groundwater resources for the benefit of people, business, and our environment.

Louisiana’s Contracting Employment

Drill and service water wells, install and service pumps, install and service point of use water treatment devices. This portion of the industry is characterized by small firms, many of which are multi-generation family-owned and operated.\(^9\)

- 118 firms employ an estimated 1,540 people\(^{10}\)
- Annual estimated sales of $346 million

Louisiana’s Scientists and Engineers Employment

Geologists, hydrogeologists, engineers, geochemists, geophysicists, microbiologists, regulators.

Environmental Consulting\(^{11}\)

NAICS 54162: Establishments primarily engaged in providing advice and assistance on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, and hazardous materials.

- 624 firms employ an estimated 2,240 people
- Annual estimated sales of $344 million

Remediation\(^{12}\)

NAICS 56291: Establishments include those engaged in remediation and cleanup of contaminated buildings, mine sites, soil, or groundwater.

- 192 firms employ an estimated 3,240 people
- Annual estimated sales of $631 million

Public Service and Universities, Colleges, and Research Centers

- Many more dedicated individuals
