

Groundwater Use in New Jersey

Overview¹

Total

Groundwater (mgd — fresh, not saline)..... 612
Percentage of total freshwater* supply for state..... 31.70%

Public Supply

Groundwater (mgd) 398
Percentage of total groundwater..... 65.00%
Percentage of total public supply 36.90%

Individual Household

Groundwater (mgd) 98.3
Percentage of total groundwater..... 16.10%
Percentage of total individual household supply 100%

Irrigation

Groundwater (mgd) 67.6
Percentage of total groundwater..... 11.10%
Percentage of total irrigation..... 49.00%

Livestock/Aquaculture

Groundwater (mgd) 10.1
Percentage of total groundwater..... 1.66%
Percentage of total livestock/aquaculture..... 100%

Industrial, Self-Supplied

Groundwater (mgd) 34.8
Percentage of total groundwater..... 5.69%
Percentage of total industrial, self-supplied 41.80%

Mining

Groundwater (mgd) 1.73
Percentage of total groundwater..... 0.28%
Percentage of total mining..... 20.00%

Thermoelectric

Groundwater (mgd) 1.57
Percentage of total groundwater..... 0.26%
Percentage of total thermoelectric..... 0.31%

(mgd = million gallons per day)

Groundwater's Role in New Jersey's Economic Vitality

- Few states can accurately or confidentially determine how many residential wells are in place. For each region, the American Housing Survey by the U.S. Census provides regional data. New Jersey is found in the Northeast, along with these other states: Maine, Vermont, New Hampshire, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, and Pennsylvania. The last American Housing Survey Census indicates this region had 3,210,000² households served by residential wells, with an average of 2.74³ persons per household. The U.S. Census stopped asking citizens their source of water supply following the 1990 Census. The USGS estimates the population of self-supplied water supply users in New Jersey to be 964,000⁴.
- 428 community water systems use groundwater for 2,140,000 people⁵
- 745 non-community, non-transient water systems use groundwater for 347,000 people⁶
- 2,420 non-community, transient water systems use groundwater for 412,000 people⁷
- 2,020 irrigation wells used serving 961 farms and 60,000 acres⁸

New Jersey's Groundwater Industry Employment

Men and women working to provide and protect New Jersey's groundwater resources for the benefit of people, business, and our environment.

New Jersey's Contracting Employment

Drill and service water wells, install and service pumps, install and service point of use water treatment devices. This portion of the industry is characterized by small firms, many of which are multi-generation family-owned and operated.⁹

- 77 firms employ an estimated 486 people¹⁰
- Annual estimated sales of \$142 million

New Jersey's Scientists and Engineers Employment

Geologists, hydrogeologists, engineers, geochemists, geophysicists, microbiologists, regulators.

Environmental Consulting¹¹

NAICS 54162: Establishments primarily engaged in providing advice and assistance on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, and hazardous materials.

- 1,090 firms employ an estimated 3,610 people
- Annual estimated sales of \$511 million

Remediation¹²

NAICS 56291: Establishments include those engaged in remediation and cleanup of contaminated buildings, mine sites, soil, or groundwater.

- 315 firms employ an estimated 3,810 people
- Annual estimated sales of \$606 million

Public Service and Universities, Colleges, and Research Centers

- Many more dedicated individuals
