

Groundwater Use in Ohio

Overview¹

Total

Groundwater (mgd — fresh, not saline)..... 929
Percentage of total freshwater* supply for state..... 9.84%

Public Supply

Groundwater (mgd) 455
Percentage of total groundwater..... 49.00%
Percentage of total public supply 33.20%

Individual Household

Groundwater (mgd) 134
Percentage of total groundwater..... 14.40%
Percentage of total individual household supply 97.80%

Irrigation

Groundwater (mgd) 17.2
Percentage of total groundwater..... 1.85%
Percentage of total irrigation..... 32.70%

Livestock/Aquaculture

Groundwater (mgd) 23.1
Percentage of total groundwater..... 2.49%
Percentage of total livestock/aquaculture..... 39.60%

Industrial, Self-Supplied

Groundwater (mgd) 197
Percentage of total groundwater..... 21.20%
Percentage of total industrial, self-supplied 40.30%

Mining

Groundwater (mgd) 79
Percentage of total groundwater..... 8.50%
Percentage of total mining..... 68.70%

Thermoelectric

Groundwater (mgd) 23
Percentage of total groundwater..... 2.48%
Percentage of total thermoelectric..... 0.32%

(mgd = million gallons per day)

Groundwater's Role in Ohio's Economic Vitality

- Few states can accurately or confidentially determine how many residential wells are in place. For each region, the American Housing Survey by the U.S. Census provides regional data. Ohio is found in the Midwest, along with these other states: Ohio, Michigan, Indiana, Illinois, Wisconsin, Minnesota, North Dakota, South Dakota, Iowa, Nebraska, Kansas, and Missouri. The last American Housing Survey Census indicates this region had 3,990,000² households served by residential wells, with an average of 2.47³ persons per household. The U.S. Census stopped asking citizens their source of water supply following the 1990 Census. The USGS estimates the population of self-supplied water supply users in Ohio to be 1,830,000⁴.
- 938 community water systems use groundwater for 2,760,000 people⁵
- 669 non-community, non-transient water systems use groundwater for 211,000 people⁶
- 2,770 non-community, transient water systems use groundwater for 369,000 people⁷
- 1,060 irrigation wells used serving 725 farms and 24,200 acres⁸

Ohio's Groundwater Industry Employment

Men and women working to provide and protect Ohio's groundwater resources for the benefit of people, business, and our environment.

Ohio's Contracting Employment

Drill and service water wells, install and service pumps, install and service point of use water treatment devices. This portion of the industry is characterized by small firms, many of which are multi-generation family-owned and operated.⁹

- 174 firms employ an estimated 985 people¹⁰
- Annual estimated sales of \$254 million

Ohio's Scientists and Engineers Employment

Geologists, hydrogeologists, engineers, geochemists, geophysicists, microbiologists, regulators.

Environmental Consulting¹¹

NAICS 54162: Establishments primarily engaged in providing advice and assistance on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, and hazardous materials.

- 650 firms employ an estimated 2,360 people
- Annual estimated sales of \$353 million

Remediation¹²

NAICS 56291: Establishments include those engaged in remediation and cleanup of contaminated buildings, mine sites, soil, or groundwater.

- 198 firms employ an estimated 2,890 people
- Annual estimated sales of \$488 million

Public Service and Universities, Colleges, and Research Centers

- Many more dedicated individuals
